06/11/2015 - 13:00

In 2012 it was presented at the Global Junior Challenge a creative and engaging project, elaborated in class between teachers and children: a laboratory to produce animations using more techniques : painting , drawing , the use of particular materials and computer activities .

Everything was then photographed by the children to create some footage of that , young artists , took care of the soundtrack from the sounds of the objects used , as real sound designer. Subsequently they chose the frame and given directions to the teachers for the realization of the assembly. The laboratory , therefore , in addition to combine art , technology and music , has resulted to consolidate the sense of belonging to a common project of children by offering them a wide range of activities and stimulating their creativity and interest in digital aspects the work itself .
