Project "**Art in Class – Towards a 3rd Millennium Bauhaus** ^[1]," developed by Researcher **Francesco Guadagnuolo** at the Istituto comprensivo **Giacomo Matteotti** ^[2] in Aprilia with the patronage of the town's culture council, will participate in the 8th edition of the **Global Junior Challenge** ^[3] in the "up to 15 years old" category.

Combining visual arts with literature, music, science, theatre, cinema, photography and new technology, the project aims to help students express themselves in an innovative manner and develop their skills and creativity.

The course, which is inspired by the German Bauhaus School, which united art, craftsmanship and industrial design into a universal vision of art, increases student abilities and develops the competences that are required on the labour market.
