## Students in collaboration for sustainable use and valuation of the local cultural heritage and the natural environment

**Nome dell'ente che lo ha realizzato /ORGANIZATION/INSTITUTE PRESENTING THE PROJECT: \*:** Kuressaare G

**Regione/Region:** Saaremaa

**Paese/ Country:** Estonia

**Città/ City:** Kuressaare

**Descrizione del progetto/Describe the project :** Project-partners (schools from Greenland, Faroe Islands, and Estonia) share a similar geographical situation (island - with natural and cultural heritage as a destination), different historical background with similar challenges for their citizens (how to keep the cultural and environmental heritage, development priorities- citizens participation in democratic decisions). The project goal is to make pupils interested to use their knowledge to increase their own consciousness about the contents of the project and to be gathered with the local community and furthermore with the international one. The natural and cultural richness and diversity of the area are the main focus. During our first project-meeting in Estonia we participated in a "Clean up Day". In cooperation with local authorities we organized waste collection activities: clean up surroundings for international projects. As an initiative we made several waste collection trips in parallel with the project. To prepare those activities, how to use ICT during mass events, we worked with local community. After our first meeting all partners started to work with local community which are connected with sustainable development, participation in democratic decisions. During project-meeting we learned how to stand up against the global trash problem, how to organize a sorting action and learned a lot about recycling possibilities. The project experience greenlandic school organizes in September will be shared with their local community - as a good example of local initiative. The project shows possibilities how these topics can be implemented in the project. We involve students and parents, how connect project-based learning with the local community. We hope that the students became aware of their own role and how good for their local communities. More about our project...
