Kilkenny, Irlanda.)In its development some small melodies, inclusive of chord for the accompaniment , will be produced by the pupils. On these “shared notes” each partner will create rhymes, poems, games, sequences of words and numbers. The music , produced in digital format (midi or audio), may be also used as a background for animations of stories and tales.. Through all that, children are guided to achieve different abilities in various primary school subjects , the improvement of their taste and of their abilities in Music and to the functional usage of English Language and new technologies. The most innovative and creative elements of the project are the comparison with foreign pupils and teachers, the usage of ICT to communicate, as well as the usage of the twinspace .
