Descrizione del progetto

Description Frase (max. 500 characters):

My project is a site which enables people to search for cars of their choice online and be able to connect with the seller.

Project Summary (max. 2000 characters):

The site enables car owners to put up their cars online and upload pictures of their cars and thus making it easier for interested buyers to get cars of their choice. It also enables people to display their cars up for hire online and charge per day. The idea was born on April when I saw that there was a problem especially for second hand sellers of cars who don't find a platform to put up their cars and also people interested in putting up their cars for hire. I hence developed this site to make it easier to connect these

people with their desired customers.

Obiettivi ed elementi di innovazione

As mentioned above the project is aimed at solving the problem of connecting car sellers with their desired clients. It will make it easier for car sellers especially those selling cars second hand since they don't have a shop to sell their cars to connect with interested clients. For this system to work, one only requires having a personal computer or a phone and having internet connectivity. The site will display cars as they are in the database and the client will be able to search for their interested car. The site is extremely user-friendly too.
